

## IB CENTER NEWS No.8

### IB Entrance Examination Info Session

On September 17, we participated in the **International Baccalaureate (IB) Entrance Examination and University Joint Information Session**. We learned that an increasing number of universities in Japan are implementing the IB entrance examination, including medical schools of medicine.

### JAPAN IB INTERNATIONAL EDUCATION CONFERENCE

On September 18, we participated in the **Japan Society for IB Education (JSBE) Conference**, where university researchers and educators gave presentations and exchanged opinions on the four IB programs (PYP, MYP, DP, and CP). After that, we took part in an exchange meeting with various attendees.

**The wide variety of learning styles and range of career choices available is what makes the IB program.**

As a school, we are preparing for the introduction of the integrated IB program from Kindergarten to High School.

We hope that the IB program will help prepare the next generation of **Mirai Change Leaders**

Information on the IB is also available on our school's website, "IB Center".
